## AIM OF THE CONFERENCE

The primary goal of the conference is the exchange of ideas, knowledge, and experiences, as well as international and national best practices, and the presentation of solutions offered by Industry 4.0 in support of the digital transformation of supply chains. The conference represents a unique national forum with international participation for discussing current issues and exchanging the latest information and applicable solutions that operations management can offer to international, regional, and national business practice. We expect participation of entrepreneurs, managers, government, and other institutions on one hand, and members of the academic community, researchers, and consultants from universities and scientific institutes on the other.
